

# In-Home Business

## When your customers' longest commute is from the kitchen to the home office, our **In-Home Business Program** has them covered!

Now more than ever, people are working from home—converting garages into workshops and spare bedrooms into offices. Unfortunately, most insurance companies exclude coverage in their Homeowners policies. That's not the case with us!

We specialize in small businesses providing retail distribution of products or services directly from the home, and operated by the insured and/or immediate family members with no more than three employees.

### **Home in on the competition with these excellent coverage features.**

- Business Personal Property
- Business Income
- Business General Liability
- Standard All Perils Deductible
- Medical Payments

We have what you need! To make you feel right at home with us, this coverage is written as a supplement to our Homeowners policy—insuring business and home together.
